1. In the last six months, Bulgaria delivered 6,000 tons of zinc concentrate, 1,800 tons of lead concentrate, and 3,500 tons of copper ore to Yugoslavia for processing in Yugoslav factories. Only a small percentage of the finished products are to be redelivered to Bulgaria. The balance of the value of these deliveries is to be paid by Yugoslavia to Bulgaria in food and vegetables which the latter does not need. Bulgarian economic authorities complain bitterly that they were forced by Russian pressure to comply with this agreement.
